# Algorithmic Impact Assessment Tool

## Algorithmic Impact Assessment

[Home](#) > [Open Government](#)

### Algorithmic Impact Assessment

1 Information in the AIA is only stored locally on your computer, and the Government of Canada does not have access to the information you place into the tool. If you wish to keep your work, please save the data locally for future use by using the 'Save' button. You can reload a previously saved AIA form using the 'Upload JSON File' button.

[Upload JSON File](#)

#### Algorithmic Impact Assessment v0.9.1

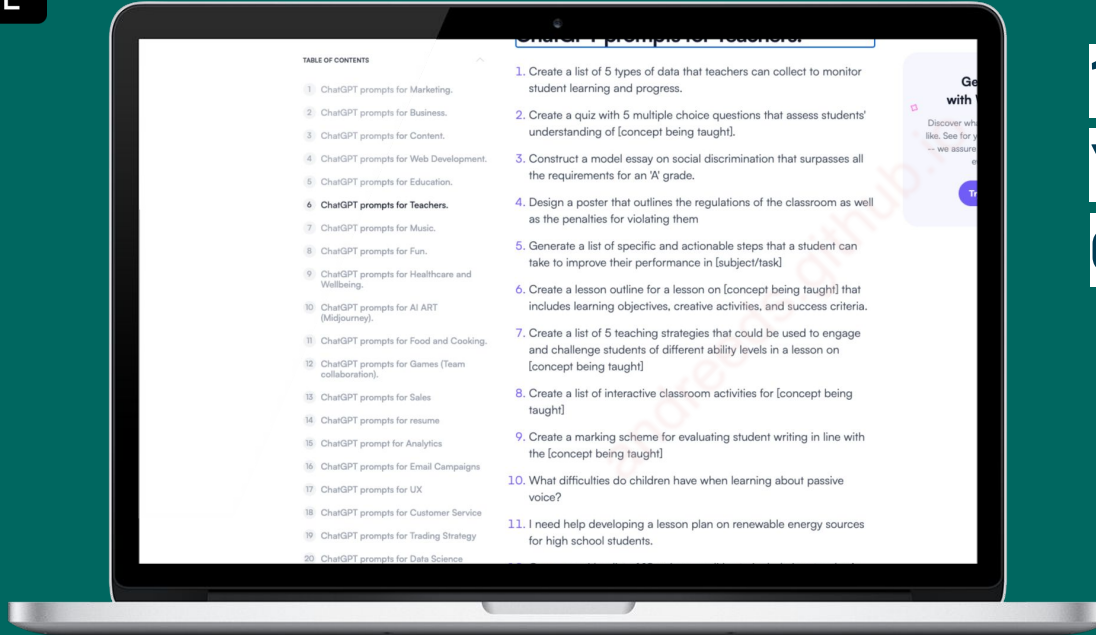

##### 1. What is the Algorithmic Impact Assessment (AIA) Tool?

The AIA is a questionnaire designed to help you assess and mitigate the impacts associated with deploying an automated decision system. The AIA helps identify the impact level of your automation project under the [Directive on Automated Decision-Making](#). Completion and release of an AIA is required by the Directive.

###### i. How does it work?

The questionnaire asks you around 80 questions related to your business process, data, system design, algorithm, and decision. The results will display an impact level for your automation project and provide information about applicable requirements under the Directive. The questionnaire takes at least 35 minutes to complete. We suggest reviewing the instructions in [section 3 of the AIA landing page](#) before you start your assessment.
